RE: RESOLUTION REQUEST – ADOPTION OF SEQR LEAD AGENCY AND DETERMINATION OF NO SIGNIFICANT ADVERSE ENVIRONMENTAL IMPACT FOR THE REPLACEMENT OF BRIDGE F-2, JACKSON STREET OVER FORGE BROOK, TOWN OF FISHKILL, NY

DPW's Engineering Division has been working with a consultant to perform planning, permitting and engineering design, including development of bid documents for a project to replace Bridge F-2, Jackson Street over Forge Brook, Town of Fishkill, NY. Resolution No. 2024059 of April 2024 authorized \$275,000 for design, permitting and right-of-way expenses. This work included preparation of the environmental assessment forms. The project was determined to be a SEQR Unlisted Action.

SEQR Lead Agency notices were sent to interested and involved agencies on December 22, 2025, and after the thirty-day response period, no agency responded to challenge the County's intent to serve as Lead Agency. In cooperation with the County's consultant, the Department completed a Short Form Environmental Assessment Form (SEAF) which documented potential environmental impacts. In conjunction with our consultant, the Department has concluded that the Unlisted Action will have No Significant Adverse Environmental Impact. The SEQR Lead Agency Notice and SEAF are attached to this memo. The Department is seeking the Legislature's adoption of the County's Lead Agency status, and to adopt the Determination of No Significant Adverse Environmental Impact for the proposed project.

Name of Action or Project: Replacement of Bridge F-2 CR 34 over Forge Brook			
Project Location (describe, and attach a location map): Jackson Street (County Route 34) over Forge Brook in the Town of Fishkill, New York. See attached Site Location Map for details.			
Brief Description of Proposed Action: This project consists of the full replacement of Dutchess County Bridge F-2. The project's intent is to replace the bridge with a similar horizontal and vertical alignment, with minimal approach work to correct deficiencies, heavy deterioration, and potentially hazardous conditions noted from the Bridge Inspection by replacing the existing structure with a new structure. Work will include full depth reconstruction, guiderail placement, utility relocation, and embankment stabilization. A temporary bridge will also be constructed as part of the project, as the use of full road closure with an off-site detour was not feasible due to the high traffic count of the roadway.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The bridge replacement project will employ standard practices to control soil erosion and sediment controls during construction, and follow standard/required time of year restrictions for work to avoid impacts to any species of concern. A two-way temporary bridge will be installed during construction to accomodate motorists, provisions for pedestrians will also be made for the temporary crossing. Private and public utilities exist throughout the project site. Coordination meetings have been held and no major impacts or service disruptions are anticipated.

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.	
☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
